

Handling and storage instructions for housings and packaging

No	Control Process	Illustration	Influence on Quality
1	1) Please store plastic and carton cases with containing housing at room temperature avoiding moisture and direct sunlight. 2) Please equalize housing temperature with room temperature.		1) There are risks of breakage and discoloration due to housing material degradation. 2) There are risks of damage on lance, hinge and broken on lock or other problems.
2	1) Please turn up a label of packages during storage. 2) Please do not apply pressure to housings in bag packages during storage. Please do not replace plastic cases and carton boxes with storage boxes.		There are risks of not correct position of child parts, deformation or other problems.
3	When bringing housings, please pay attention in order not to give damage or shocks to the products.		There are risks of deformation, breakage, not correct position of child parts or loss of parts.
4	Please put the cover or close the bag to prevent from dust.		There is a risk of contact defect due to adherence of dust. Also there is a possibility to cause sealing defect.
5	When carrying housings, please hold the underside of the container with both hands. Do not put the box vertically and not push the upperside of the box.		There are risk of deformation, damage or loss of parts.
6	Please store your products by the method of not applying loads on housings.		There are risks of deformation due to the pressure of the weight and risks of breakage due to the shock.

* Since there are products applying different handling methods, please refer to the instruction of each product for details.
